EDUCATION

Vellore Institute of Technology B.Tech in Computer Science, CGPA: 8.35	November 2022- May 2026 Bhopal, India
Delhi Public School Kolar Road Class XII (CBSE), Percentage: 87.8%	March 2021- May 2022 Bhopal, India
Delhi Public School Kolar Road Class X (CBSE), Percentage: 87.4%	March 2019- May 2020 Bhopal, India

TECHNICAL SKILLS

Machine Learning (Supervised & Unsupervised Techniques, Model Evaluation, Hyperparameter Tuning), TensorFlow, OpenCV, AWS, Streamlit, Flask, Python, SQL, C++

EXPERIENCE

Data Science and Analytics Intern Zidio Development	January 2025 - February 2025
- Built automated Python-based ETL flows for IPL datasets that cut preprocessing time by 70% and improved model experimentation speed. - Benchmarked multiple ML algorithms (K-Means, Logistic Regression, Random Forest, Linear/Logistic Regression), leading to models reaching ~88% accuracy. - Designed clean, insight-focused visual dashboards that helped non-technical stakeholders understand player performance trends and match patterns. - Produced an IPL match-outcome model using feature engineering (strike rate, economy, historical performance) and achieved ~85% predictive accuracy on held-out games.	

PROJECTS

Smart Vision System for Real-Time Vehicle Analytics	May 2025 - June 2025
- Applied YOLOv8 to classify 12+ vehicle types using a 767-image dataset, reaching 86.8% mAP with strong precision/recall. - Delivered a Streamlit + OpenCV dashboard for real-time detection, count tracking, and visual monitoring. - Tuned inference speed to suit edge-style environments without compromising model reliability. - Synthesized business insights from detection results with automated reports, data visualizations, and summary tables to drive data-driven decisions.	
VitalAI: Scalable Healthcare Prediction API	September 2024 - December 2024
- Created ML models (XGBoost, SVM, CatBoost) with ROC-AUC scores up to 0.88 while maintaining interpretability via LIME/SHAP. - Enhanced predictive strength through engineered features like BMI ratios, pulse-pressure metrics, and interaction terms. - Packaged preprocessing, training, and inference into modular pipelines with joblib-based serialization. - Exposed predictions through FastAPI endpoints, enabling low-latency integration into digital health systems.	
Intelligent Conversational System on PDF Files	March 2024 - April 2024
- Built a semantic retrieval engine using LangChain + FAISS that surfaced context-aware answers from long PDFs. - Added sentence-level embeddings and smart chunking to increase retrieval relevance over keyword search. - Integrated a Streamlit interface with Gemini to enable natural-language Q&A across 10+ page documents. - Reduced manual document review time by 60% through accurate extraction and conversational summarization workflows.	

CERTIFICATIONS

AWS Solutions Architect - Associate Certification (Ethnus)	April 2025
- Gained practical understanding of cloud architecture, networking, identity management, and secure deployment workflows. - Applied hands-on experience with compute, storage, monitoring, and configuration tools to design scalable system setups.	
Getting Started with Artificial Intelligence (IBM)	April 2025
- Built foundational knowledge of core AI/ML concepts, model pipelines, and real-world decision-making applications. - Explored practical use cases of machine learning, including supervised/unsupervised tasks and basic model evaluation techniques.	
GenAI Job Simulation (BCGX)	November 2025
- Completed a GenAI job simulation focused on building prompt-driven solutions, evaluating model outputs, and applying responsible AI principles to real business scenarios. - Explored industry use cases of generative models by designing prompts, refining responses, and assessing AI-driven insights for practical decision-making.	

EXTRA CURRICULARS

Social Work Intern Kshitiksha Foundation	June 2023 - July 2023
Volunteered with Kshitiksha Foundation on environmental and community initiatives, including tree plantations, food distribution for underserved groups, stray-animal care, and local clean-up/sustainability drives.
